## WHAT IS MISSING?

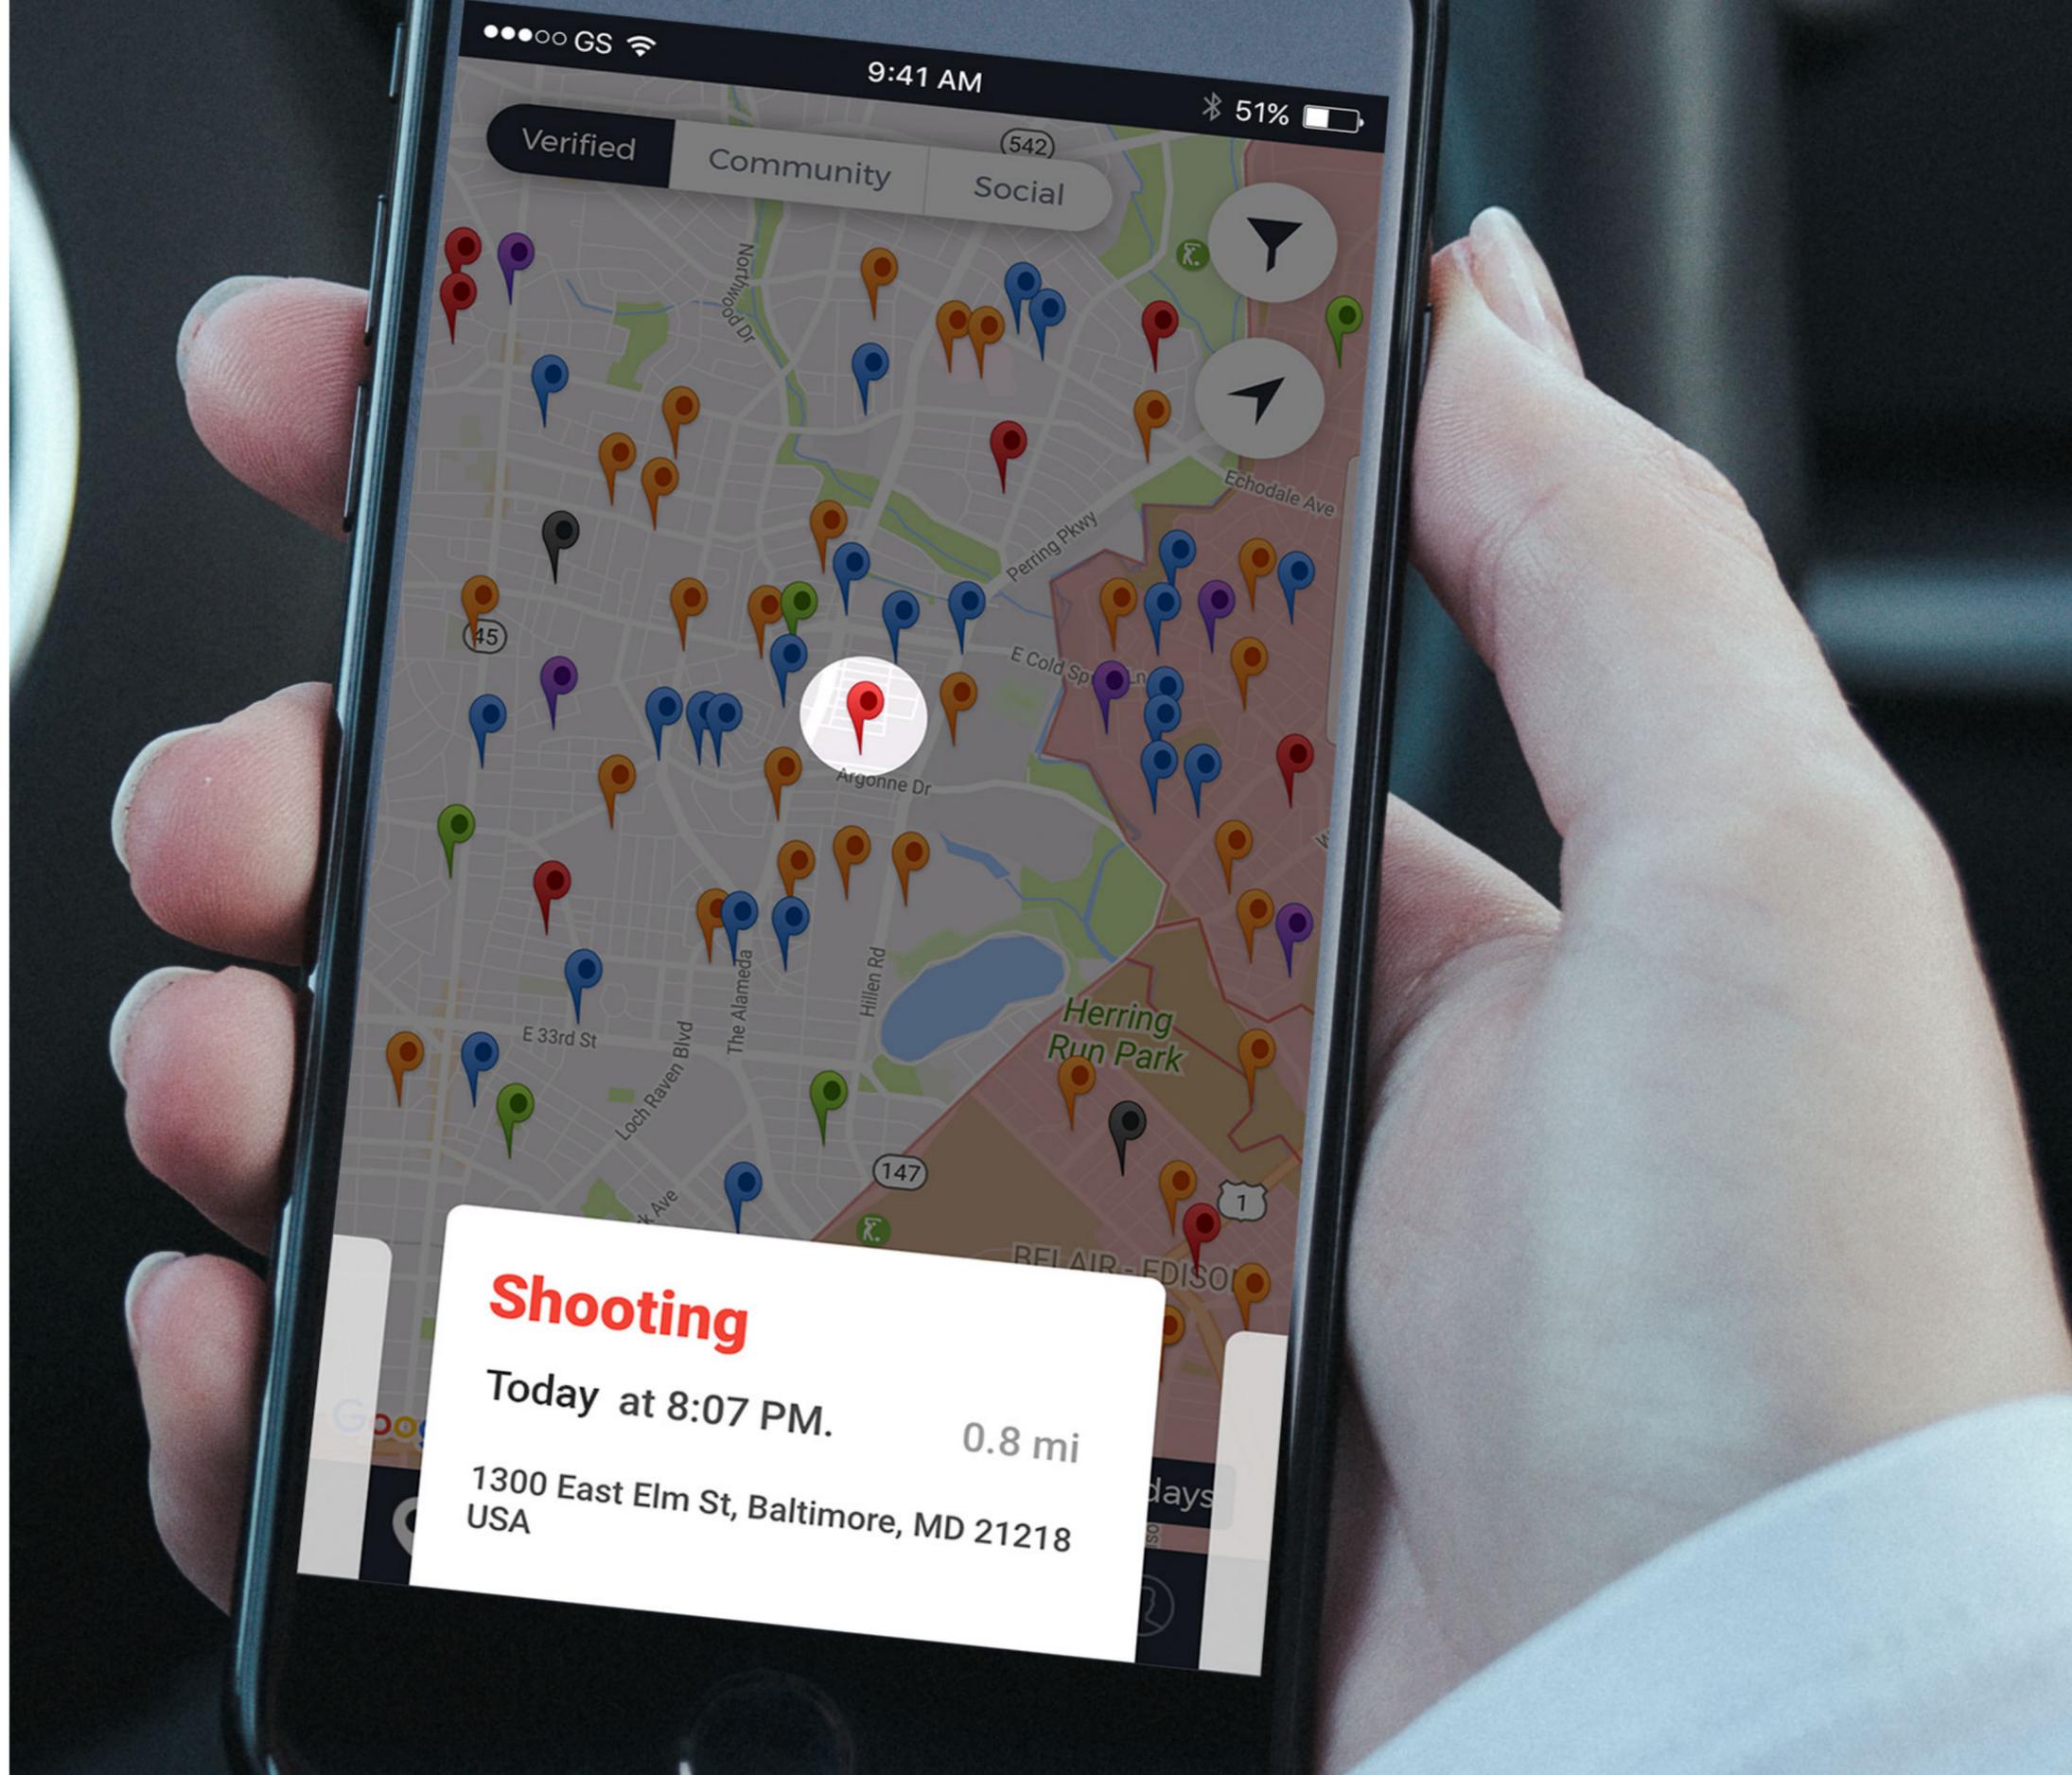

- Crime Data
- Current Events
- Social Media
- Safety Tips
- Local News
- Crowdsourcing
- Live Interaction
- Personalization

The Solution?

# RedZone™

Because you matter

## Up-to-date

Combines real-time crime & social data with advanced GPS navigation capabilities

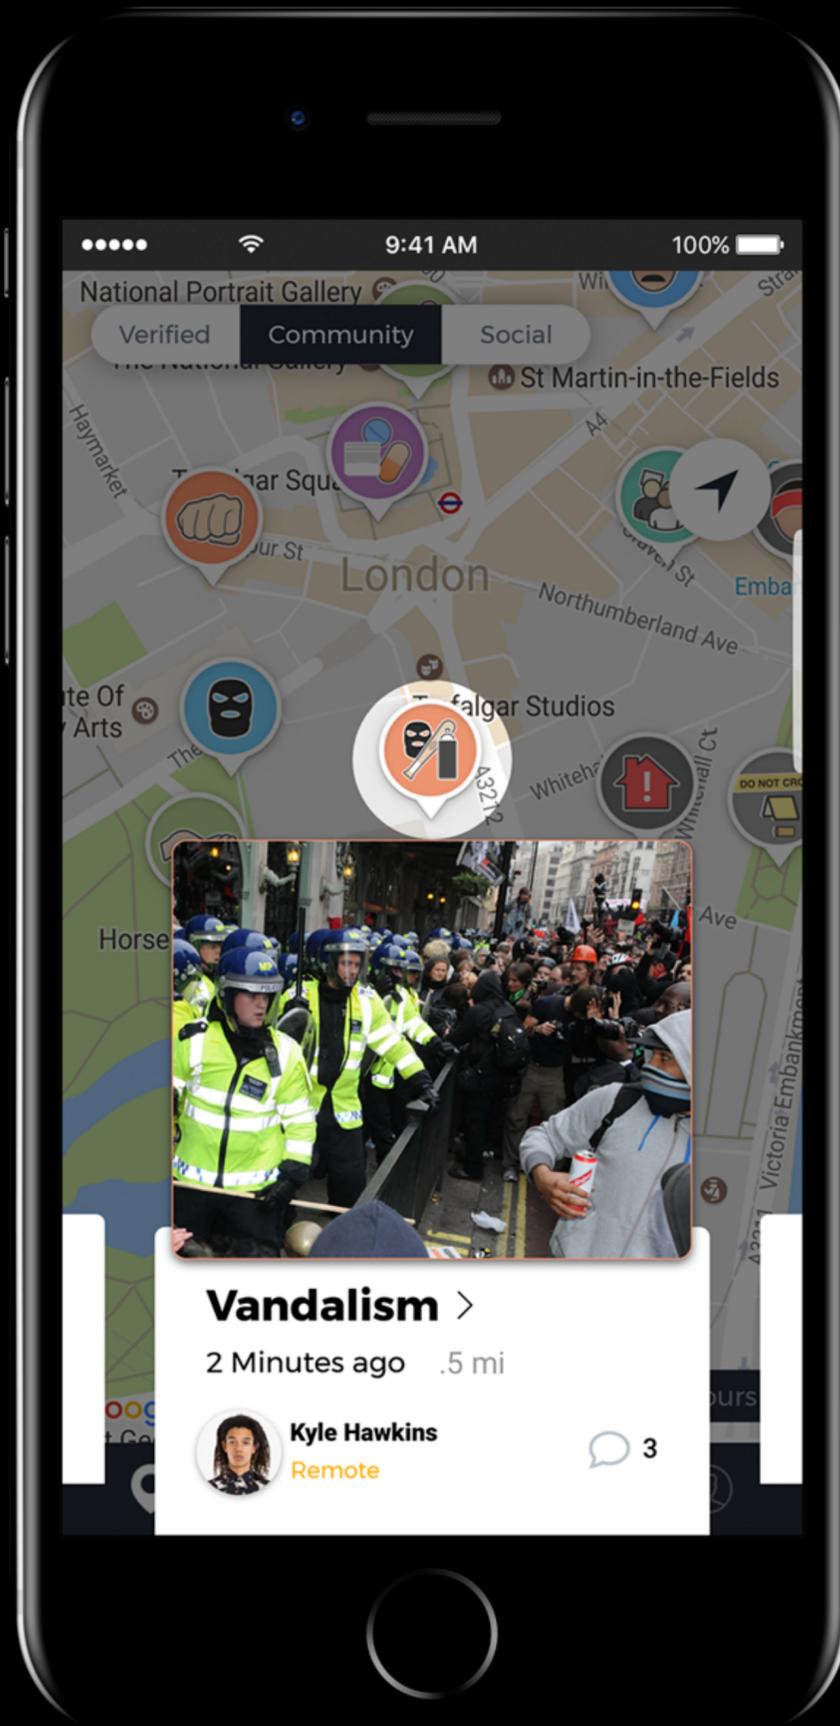

## Location-based Alerts

A personalized alerting system that has your concerns and daily habits in mind

## Peer to Peer

Crowdsourcing technology allows our users to report incidents of any kind

# The Safe Route™

It's simple. We invented a product that reduces the likelihood of you running into a situation that threatens your personal wellbeing.

## Unprecedented Data

We have over 3 million records of US crime data from the past 7 months that are factored into your route.

## Self-learning Algorithm

Your route is based on your preferences and your driving habits. The more you drive, the smarter your routes become.

## Real-time Adaption

Unordinary events happen. That's why we give you the option to redirect based on an imminent threat that may lay ahead.

# Vast Data Sources

3 million data entries in 7 months from 1,500 resources spanning the U.S. and covering more than 1,250 cities

## Governments

Local, state and national law enforcement and fire and rescue agencies

## Private Enterprises

Private and third-party security organizations monitoring local neighborhoods and communities

## Global Press

Automated syndication of written media from around the world

## Social Media

Social media including Facebook and Twitter

## Traditional Media

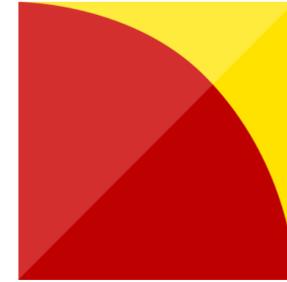

TV, radio, print and other media outlets

## Our User Community

First-hand reports that come directly from active users

# Main Objectives

## 1. Continual Aggregation

To develop a state-of-the-art AI system for Crime Prediction and Support

## 2. Resource Deployment

Provide data intelligence to —

- Law enforcement
- Real Estate
- Security Agencies
- Local Business
- New + Media Outlets
- Educational Institutions
- Public Services

# Sub-objectives

## 3. Get less technical

Invent basic terminologies that can be understood by the mass population(s)—  
Crime Velocity, Crime Trend, Flow, Flux, etc

## 4. Develop Metaphoric

Come up with basic terminologies that can be understood by an average user —

- Income Disparity
- Employment factor
- Financial Wealth
- Education level

# Crime Prediction Support System

(KEY INDICATORS)

# CPSS Touchpoints

Crime Prediction Support System

## Safe Travel Support System:

RedZone Map CPSS module ensure that the already planned travel route is safe. If not, re-routing and alerting will notify the user to correct their course in light of potential hazards ahead.

## Crime Zone Surveillance System:

A full-fledged CPSS meant for keeping round the clock surveillance on crime zones so that the security forces can either prevent or confront expected (predicted) criminal or terrorist activities.

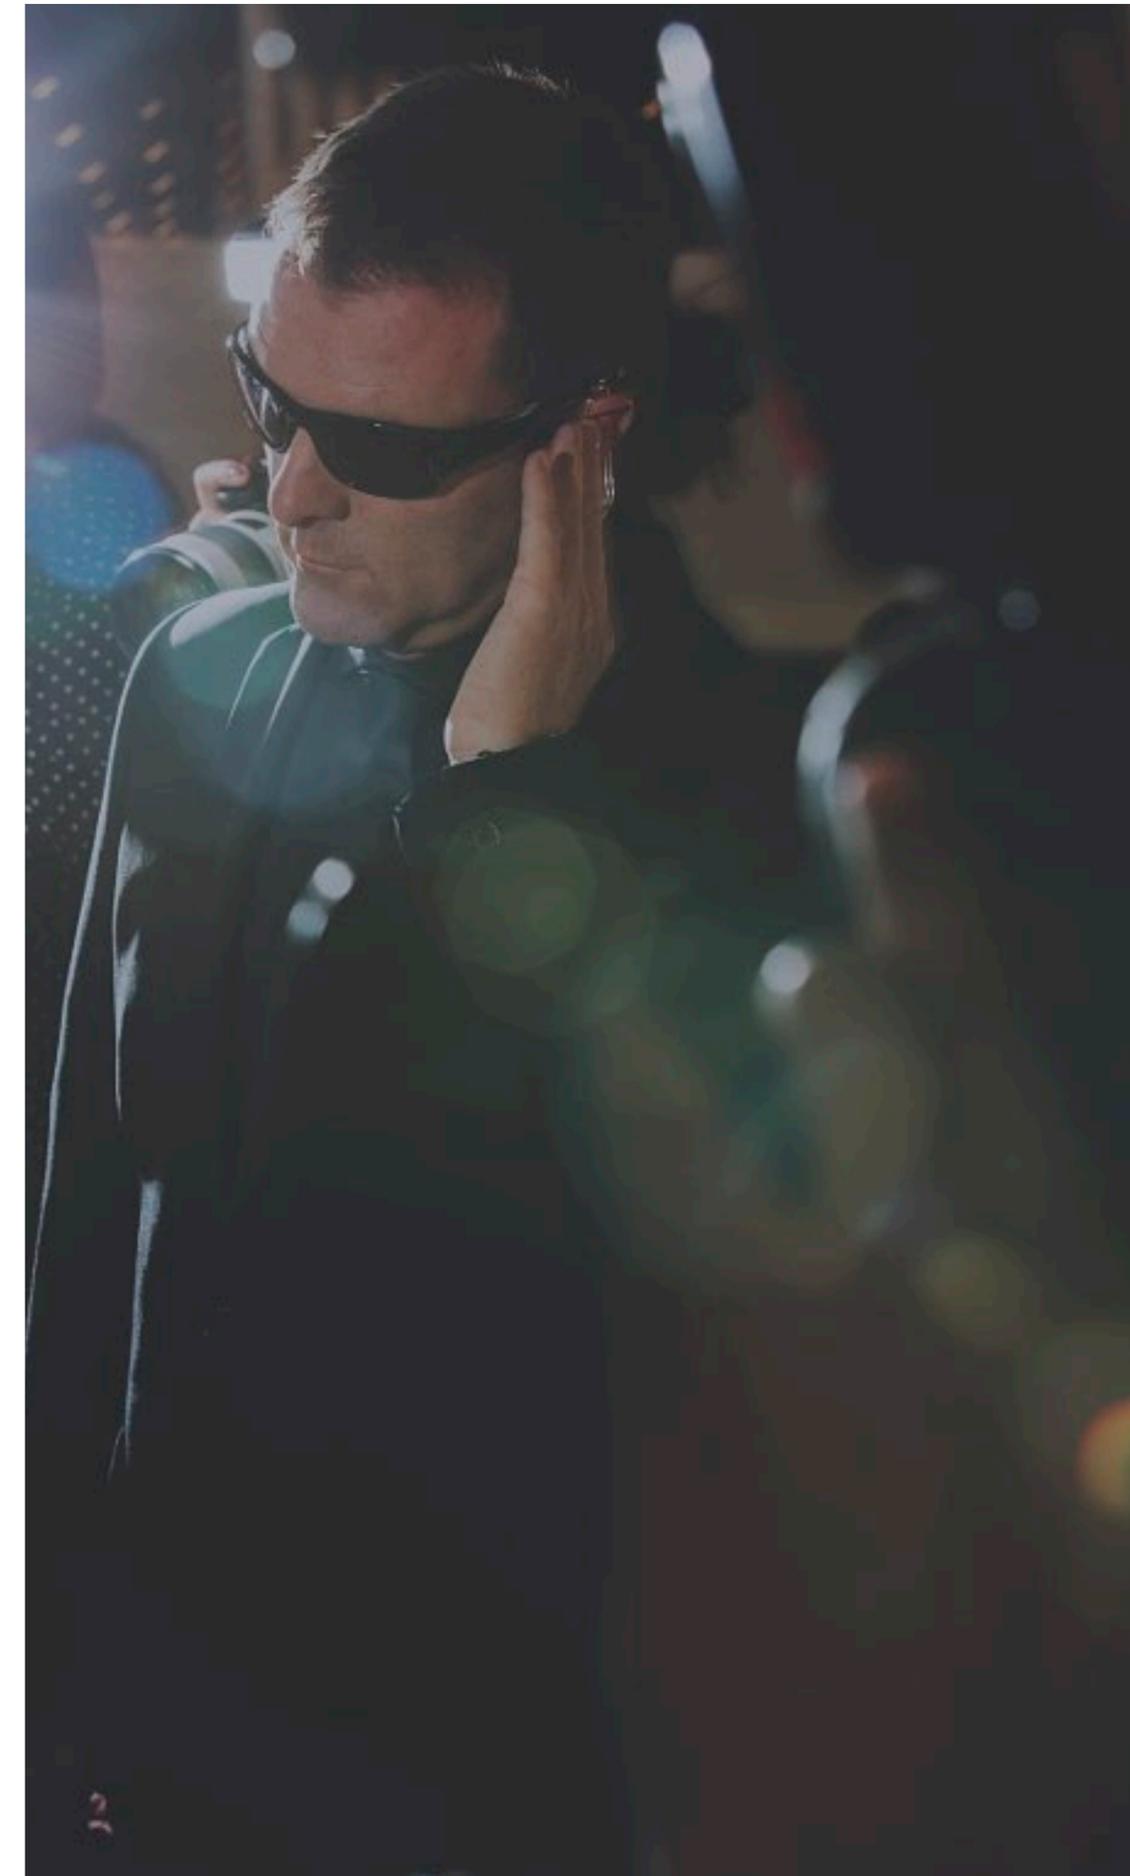

---

## Commando Engagement Advisor:

A well advanced cybernetic 'Control and Command' expert system that would help engage commandos to combat criminals and terrorists effectively for crime prevention or their elimination.

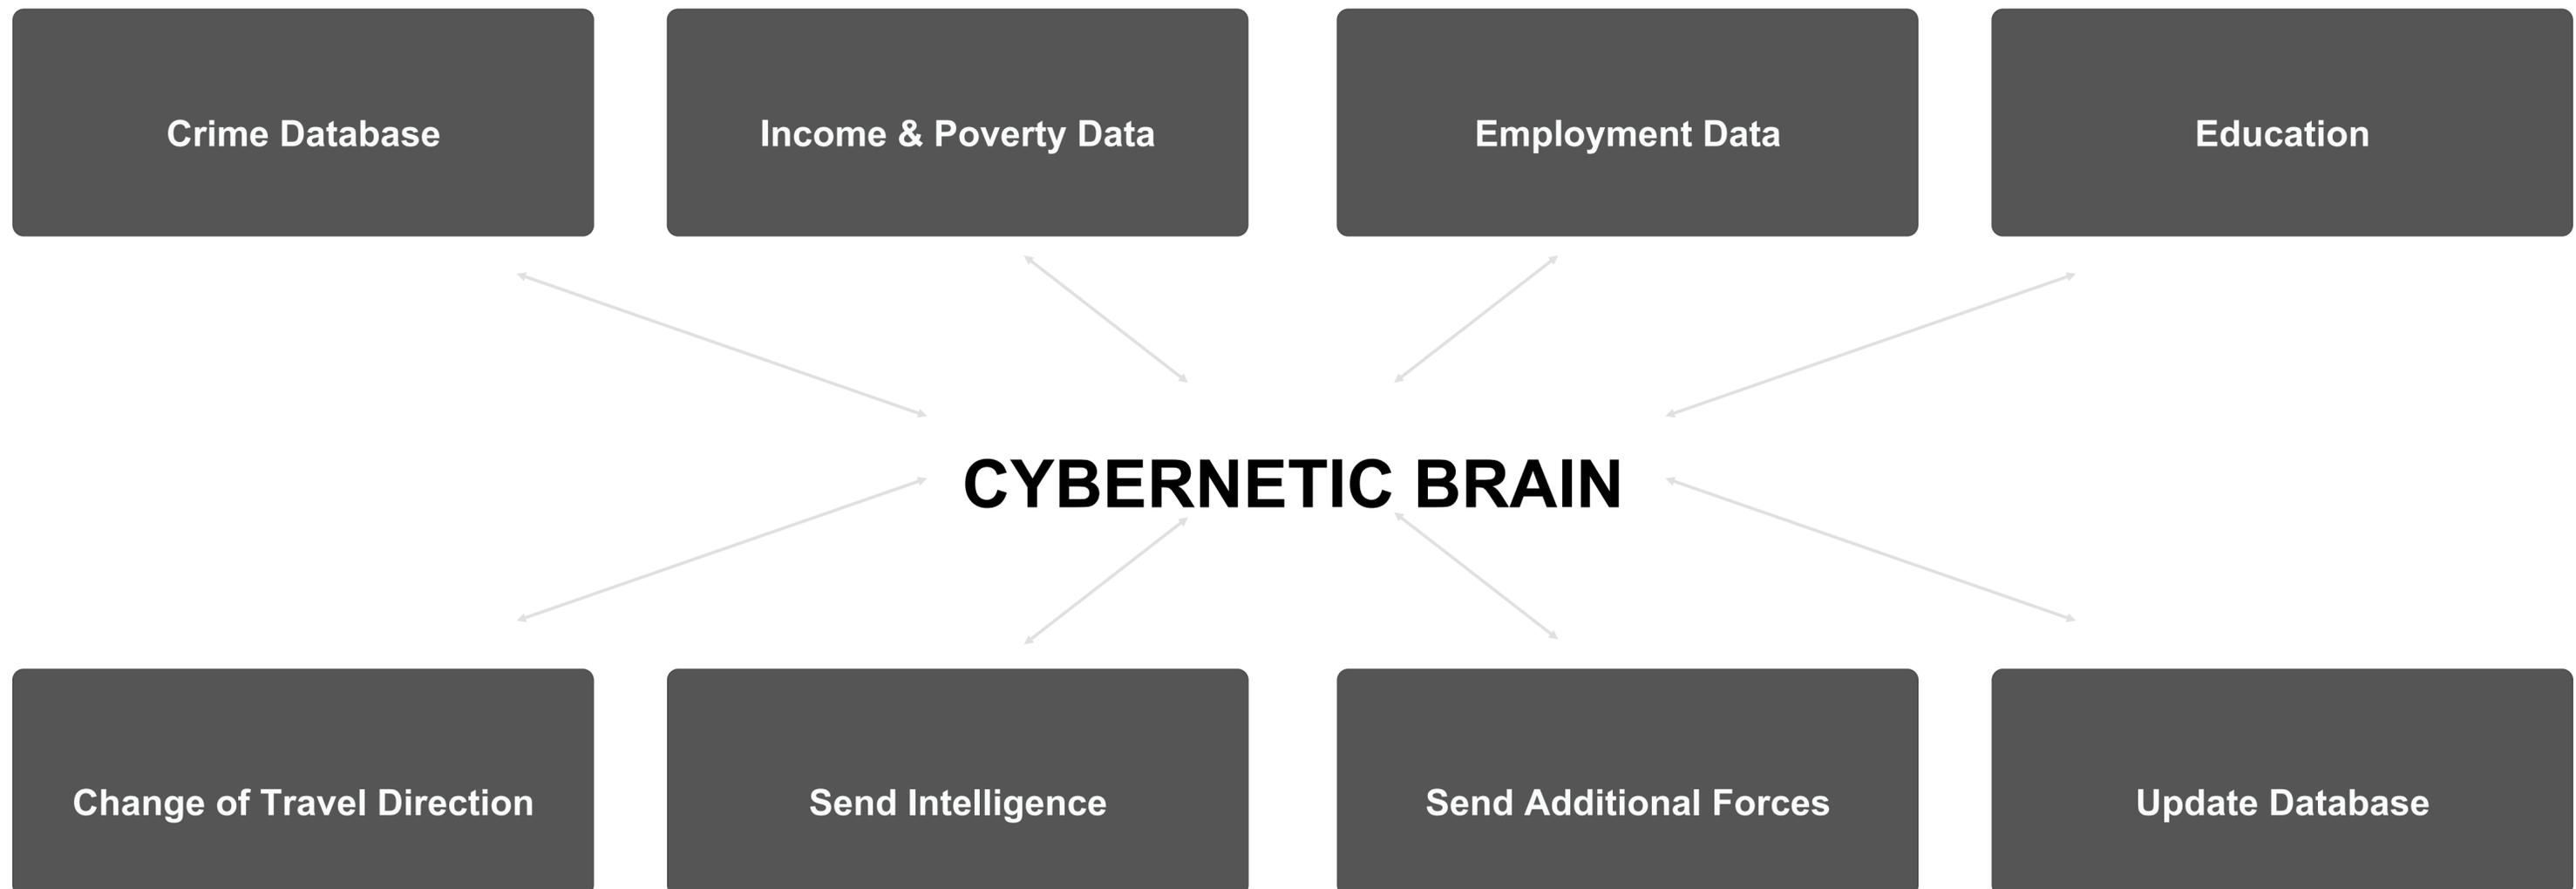

## Crime Alert System for Media:

A module of CPSS that would enable media to alert the public about possible criminal and terrorists activities.
